## TROFFER LIGHT

### Description

IntrinsiX STRATA Series sets the new standard for all LED Troffer Lighting. It offers 3 field selectable color temperatures:(3500K, 4000K, 5000K).

The STRATA also offers 3 field selectable wattages (24W/36W/45W) making the STRATA the best option for new construction or renovation.

The Intrinsix STRATA has several advantages over conventional lighting sources, including low maintenance and blending into the ceiling.

These lamps are also less prone to glare than other lighting sources. These are especially helpful in a location with a dropped ceiling like office spaces, basements and garages.
